## THE INVESTMENT MANAGERS

**LEE GARDHOUSE**  
Chief Investment  
Officer

**ROGER CLARK**  
Fund Manager

**ELLEN POWLEY**  
Fund Manager

Investment research is a core part of our business. We believe exceptional fund managers are few and far between, but can be identified using a combination of rigorous statistical analysis and face-to-face meetings.

### HOW DO WE SELECT INVESTMENTS?

Our proprietary, in-house quantitative model looks at over 2,000 funds and allows us to see more than just past performance. It enables us to drill down and decipher why a fund is at the top (or bottom) of performance tables. A key way to judge a manager is to find out if they consistently add value with their stock selection. In other words, do they do better than we would expect when considering their investment style? That is one of the key things we look for when we evaluate managers.

### MORE THAN JUST NUMERICAL ANALYSIS

In addition to number crunching, we have unrivalled access to fund managers and conduct hundreds of face-to-face meetings each year. These meetings explore the manager's philosophy, process, team and incentivisation, among other things. We do all this because we want our clients to have exposure only to the limited pool of exceptional talent available. Each fund goes through a rigorous selection process. We constantly monitor funds and regularly review sectors to ensure you're invested only in what we believe are the very best funds.

**PORTFOLIO UPDATE** – The coronavirus pandemic has affected many companies' ability to pay dividends. The Multi-Manager team have spoken to the managers of the funds they invest in about expectations for income for the rest of the year. As a result, they've taken the decision to reduce the dividends paid on a number of the Multi-Manager funds, and this will reduce the level of income you receive from this portfolio. The dividend cut will take effect from the payment due on 29 May 2020. You can read more about the dividend cuts on the underlying Multi-Manager funds [www.hl.co.uk/multi-manager-income-reduction](http://www.hl.co.uk/multi-manager-income-reduction)

## Backtested, and since launch, performance

\* Bank of England base rate net of basic rate tax until 5th April 2016, gross thereafter.

The portfolios have been available since 03 June 2015. We have added the performance since launch as indicated by the vertical line. The Multi-Manager funds have been trading since at least 2009 and in most cases much longer, this has enabled us to backtest the performance data to give an indication of the likely performance pre-launch. We have selected a five year performance time frame which includes backtested performance up to the 03 June 2015, and actual performance since the 03 June 2015.

### ABOUT THE BENCHMARK

The Investment Association (IA) is the UK fund industry's body. This portfolio uses a benchmark made up of two IA sectors to reflect the benchmark of the underlying Multi-Manager funds. The benchmark comprises 80% IA UK Equity Income sector and 20% IA Global sector.

**Past performance is not a guide to future returns.**

## MARKET REVIEW AND OUTLOOK

Coronavirus started as a small outbreak in Wuhan, China and grew to a global pandemic in the three months to 30 April 2020. In a bid to control the spread of the virus, governments across the world have restricted movement of people, resulting in travel bans, cancelled sporting events, and deserted high streets. The lockdown has negatively impacted economic growth, and caused significant stock market volatility.

All major stock markets lost money over the period. The UK was the worst performer, followed by Europe, Japan and the emerging markets. The US stock market delivered the best return although it still lost money.

Within the portfolio, we sold our investment in Legal & General UK 100 Index and used the proceeds to appoint Francis Brooke from Troy to manage a portion of the portfolio on our behalf. He's an experienced investor and we think his focus on relatively stable businesses proven to endure tough times in the past blends well with the approaches of other managers. We also added to our investment in Jupiter Asian Income to further diversify the portfolio's income stream.

This portfolio has a holding in LF Equity Income, which remains suspended and is in the process of being wound up. This means that the investments are being sold, and cash is being returned to investors in a series of payments. We have so far received two payments which have been reinvested. We have a number of exceptional fund managers to choose from and will deploy any future payments as they come in as quickly and efficiently as possible.

## Underlying holdings in focus

### JUPITER GLOBAL VALUE EQUITY

Ben Whitmore and Dermot Murphy seek companies that have fallen out of favour and whose shares can be bought at an attractive price. They invest in those they think will turn themselves around, which could see their share prices rise. If this happens, or if their view on a company changes, they'll sell it and invest the proceeds into a new opportunity. Whitmore has managed funds using this process for many years and we think he has the potential to deliver for long-term, patient investors.

### ARTEMIS – ADRIAN FROST

Adrian Frost, along with co-managers Nick Shenton and Andy Marsh, look for companies with healthy cash flows and dividends, whose shares they believe are good value. They like businesses that keep incrementally improving, which could ultimately help their share prices rise. Adrian Frost is one of the UK's longest-serving UK equity income fund managers and we think this experience, combined with a process that's been honed over many years, should see this part of the portfolio in good stead.

### JUPITER ASIAN INCOME

Many investors don't look to Asia when investing for income. But that's exactly what this fund does. That makes it different from most other income funds out there. Jason Pidcock tends to focus on developed Asian economies like Australia and Singapore. He looks for companies run by good management teams, which make plenty of cash to support dividends. He's got a long track record of identifying strong companies with the potential to pay a high income.

## IMPORTANT INFORMATION

Factsheet correct as at 30/04/20. All investments and any income from them can fall and rise in value so you may get back less than you invest.
