This Key Information Document (KID) is issued by the manufacturer of the product, Alvarium Fund Managers (UK) Limited (the "Manufacturer"), a firm authorised and regulated by the Financial Conduct Authority in the United Kingdom.

Production Date: 17 September 2020.

### WHAT IS THIS PRODUCT?

#### TYPE

Ordinary shares in HOME REIT plc (the "Company") which are denominated in Pounds Sterling. There is no maturity date for the shares and the only way of achieving value for your investment is to sell the shares to another party on the open market.

#### OBJECTIVES

The Company is a real estate investment trust targeting inflation-protected income and capital returns through funding the acquisition and creation of high-quality homeless accommodation across the UK. The Company will target assets let on very long leases (typically 20 to 30 years) to registered charities, housing associations, community interest companies and other regulated organisations, which have a proven operating track record. The Company will seek to acquire assets across various sub-sectors within homelessness including, but not limited to, women fleeing domestic violence, people leaving prison, individuals suffering from mental health or drug and alcohol issues and foster care leavers. Properties will be exclusively let with upwards-only rent review features, which is expected to deliver to investors inflation-protecting income characteristics. The Company intends to borrow up to a maximum of 35% of the gross asset value in order to enhance returns on investments. The Company aims to provide income to its investors through the payment of quarterly dividends, subject to the availability of sufficient funds.

#### INTENDED INVESTORS

This product is intended for retail investors who are prepared to take on a relatively high level of risk of loss to their original capital in order to get a higher potential return, and who plan to stay invested for at least 5 years. It is designed to form part of a portfolio of investments in Real Estate in the UK.

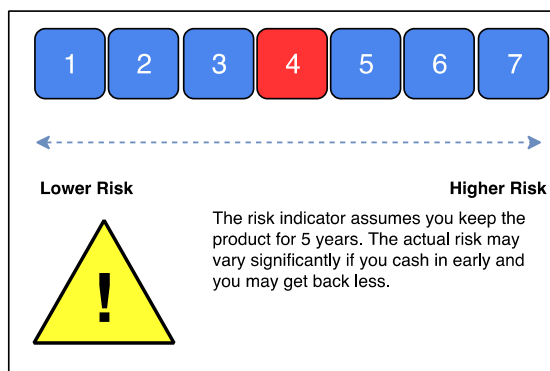

#### TERM

The Company has no fixed winding-up date.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

#### RISK INDICATOR

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Company is not able to pay you.

We have classified this product as 4 out of 7, which is a medium risk class. Poor economic conditions are likely to impact the performance of the Company and consequently the capacity of the product to provide returns to investors. This product does not include any protection from future market performance, so you could lose some or all of your investment.

### PERFORMANCE SCENARIOS

The table below shows the returns you could receive over the next five years under different scenarios, assuming that you commit £10,000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies and are not an exact indicator. What you

get will vary depending on how the market performs and how long you keep the investment. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

The figures shown below include all the costs of the product itself but may not include all the costs that you pay to your broker, advisor or distributor. The figures do not take into account your personal tax position, which may also affect how much you get back.

#### WHAT HAPPENS IF THE COMPANY IS UNABLE TO PAY OUT?

The performance of your investment depends upon the performance of the Company and the ability to sell or dispose of your shares held in the Company. Investments in the product are not covered by an investor compensation scheme.

#### WHAT ARE THE COSTS?

##### COSTS OVER TIME

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get under the Moderate scenario specified above. The total costs take into account one-off, ongoing and incidental costs.

The amounts shown below are the cumulative costs of the product itself, for the expected holding period. The figures assume you commit £10,000. The figures are estimates and may change in the future.

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs and show you the impact that all costs will have on your investment over time.
