The HL Select Umbrella Trust (the "Trust") is structured as an Umbrella Unit Trust, in that different Sub-Funds ("Funds") may be established from time to time by Hargreaves Lansdown Fund Managers Limited (the "Manager") with the approval of the Financial Conduct Authority (FCA), the agreement of the Trustee and Depositary, and in accordance with the Trust Deed.

The Trustee and Depositary's fee is 0.01% of the first £100 million and 0.0075% thereafter of the net asset value of the Trust per annum, plus VAT.

The Manager is not permitted to levy a redemption charge or increase the rates of its initial or annual charges unless 60 days' prior written notice of the introduction of the new charge and the date of its commencement has been given to all unitholders and the Prospectus has been amended to reflect the change.

Full details of the underlying charges are set out in the Key Investor Information for the Trust which is published on Hargreaves Lansdown's website, <http://www.hl.co.uk/funds/hl-funds/hl-select>. Copies may be obtained from Hargreaves Lansdown Fund Managers Limited, Sunderland SR43 4AS or directly from the Manager - Hargreaves Lansdown Fund Managers Limited, One College Square South, Anchor Road, Bristol, BS1 5HL.

Unit Price

Units in the Trust are single priced. This means that (subject to any dilution adjustment and initial charge) the price of each unit for both buying and selling purposes will be the same and determined by reference to the particular valuation point. The price of each unit of any class will be calculated by reference to the proportion of the net asset value of the Fund attributable to units of that class by:

- taking the proportion of the net asset value of the relevant Fund attributable to the units of the class concerned at the valuation point of that Fund;
- dividing the result by the number of units of the relevant class in issue immediately before the valuation point concerned; and
- increasing or decreasing the result by any dilution adjustment determined by the Manager.

The Funds are normally valued at 11.00 am each day for the purpose of determining the unit price. With the agreement of the Trustee and Depositary the Funds may be valued at other times.

General Information (continued)

Dealing in Units

Dealing confirmations are issued for all purchases and sales of units and will be posted within 24 hours of the next valuation point following receipt of your application.

The units of the Trust are non-certificated.

Units may be sold back to the Manager at any time at the price applicable at the valuation point following receipt of instructions.

You will receive a dealing confirmation setting out the details and payment will follow, normally within three working days of receipt of the signed form of renunciation.

Daily prices are currently available from the Hargreaves Lansdown website (www.hl.co.uk), HL App (HL Live) and our Helpdesk on 0117 900 9000.

Cancellation Rights

If you receive financial advice on a face-to-face basis regarding your investment, you will have a right to change your mind. If you receive financial advice on a non face-to-face basis, we will also allow you the right to cancel your investment. If you decide to cancel your contract during the 14 days after the date on which you receive a cancellation notice from us and the value of your investment has fallen at the time we receive your completed cancellation notice, you will not receive a full refund of your investment and an amount equal to any fall in value will be deducted from the sum you originally invested.

Taxation - Income

Income earned by unitholders from the Trust is liable to UK Income Tax at the rate applicable for the individual unitholders.

Fund Cross Holdings

No Fund held shares in any other Fund within the Trust during the period.

Taxation - Capital Gains

There is no tax on capital gains within the Trust. Gains realised on disposal of units by unitholders who are UK resident for taxation purposes may be liable to Capital Gains Tax.

All taxation information in this Report is based on current legislation and may be subject to change. Any tax reliefs referred to are those currently applying. Their value depends on the individual circumstances of the unitholder.

Unitholders subject to UK tax should note that a switch of units between Funds is normally treated as a redemption and sale and should be treated as a disposal for the purposes of Capital Gains Tax. Conversions between different unit classes in the same Fund should not give rise to a disposal for UK Capital Gains Tax purposes. Unitholders should seek their own professional tax advice in this regard.

Report and Scheme Particulars

Copies of the Scheme Particulars and Interim and Annual Report and Financial Statements may be obtained from the Manager at the address shown at the beginning of this Report.

The maintenance and integrity of the Hargreaves Lansdown Plc website is the responsibility of the Directors; the work carried out by the Auditor does not involve consideration of these matters and, accordingly, the Auditor accepts no responsibility for any changes that may have occurred to the Financial Statements since they were initially presented on the website.

Commission

Commission may be payable to authorised intermediaries, rates are available on request and details are set out on the dealing confirmation.

General Information (continued)

Status

The Manager can only provide information on its own range of Trusts to retail clients.

Assessment of Value

For each of its funds, Hargreaves Lansdown Fund Managers Limited (HLFM) published an Assessment of Value covering the financial year ended 30th September 2022. These statements are available on Hargreaves Lansdown's website (www.hl.co.uk).

Important Investment Notes

You should be aware of the risks involved in investing in the Trust. A list of factors is provided below, although this list may not be exhaustive. Certain risk factors will apply to different Funds to different degrees depending on their investment objective and policy. If you have any doubts over the suitability of an investment, please contact a financial adviser for advice.

The price of stock market investments can go down as well as up. This could happen to individual securities, or to a market as a whole. This means the value of your investment in a Fund can go down as well as up, and you may get back less than you invest or expect. Investing is a long-term decision and, in particular, is not suitable for money which may be needed at short notice.

Prices can be influenced by many micro and macro factors such as national and international political and economic news and events, corporate earnings reports, demographic trends and catastrophic events, any of which may affect the value of your investment in a Fund.

Economic factors might include data, policies or programs relating to interest rates, inflation, supply and demand, trade, fiscal, monetary, and employment, any of which may affect the value of your investment in a Fund.

The Funds may have exposure to smaller companies, which are more volatile and sometimes more difficult to trade than larger companies, and which may result in above-average fluctuations in price.

The Funds may have exposure to overseas holdings. Overseas investments can involve certain risks, including that the value of the assets of the Fund may be affected by uncertainties such as changes in government policies, taxation, fluctuations in foreign exchange rates, the imposition of currency repatriation restrictions, social and religious instability, political, economic or other developments in the law or regulations of the countries in which the Fund may invest, including changes in legislation relating to the level of foreign ownership in the countries in which the Fund may invest.

The Funds may have exposure to emerging or less developed markets, where the legal, judicial and regulatory infrastructure is still developing. Investing in these markets involves increased risks and special considerations not typically associated with investment in major developed markets. For example:

- o some emerging markets may carry higher risks, such as liquidity risks, currency risks/control, political and economic uncertainties, legal and taxation risks, settlement risks, custody risk, an increased risk that a proposed investment is found to be fraudulent and an increased likelihood of a high degree of volatility, for investors such as the Fund;
- o there may be less state regulation and supervision of these emerging markets, less reliable information available to brokers and investors than in relation to major western markets, and consequently less investor protection;
- o the accounting, auditing and financial reporting standards and requirements in emerging / developing markets are often less stringent and less consistent than those applicable in developed markets;
- o corporate legislation regarding the fiduciary responsibility of directors and officers, as well as protection of shareholders, is also often significantly less developed, and may impose inconsistent or even contradictory requirements on companies;
- o less information may be available to investors investing in securities of companies in emerging / developing markets, and the historic information which is available is not necessarily comparable with or of relevance to many developed countries.

The Funds may have exposure to currencies other than Pound Sterling (GBP), particularly where it has an overseas focus. Changes in currency exchange rates may cause the value of units in the relevant Fund to go up or down, independently of movements in the value of the underlying investments, which would affect the value of your investment in the Fund.

Important Investment Notes (continued)

The Funds may invest in initial public offerings, which frequently are smaller companies. Such securities have no trading history, and information about these companies may only be available for limited periods. The prices of securities involved in initial public offerings may be subject to greater price volatility than more established securities.

Any income provided by your investment in a Fund will vary. Expected or indicated income levels may not be achieved – in particular, yields are quoted for illustrative purposes only and are not guaranteed.

The risk of concentration may arise when a Fund is predominantly invested in a single country and/or geographic area, or has limited industry diversification. The Funds may intentionally hold a small number of investments, which will also give rise to concentration risk. The price of such a Fund may be more volatile than that of more broadly diversified funds.

A lack of liquidity in the assets in which a Fund invests (whether due to difficult market conditions or otherwise) may adversely affect the Fund's ability to dispose of such assets and/or the price at which such assets can be sold. The absence of reliable pricing information in an asset held by the Fund may make it difficult to assess the market value of such assets.

Trading on a securities exchange (generally or in respect of a particular issuer) may be suspended or halted pursuant to the securities exchange's rules as a result of market conditions, technical malfunctions which prevent trades from being processed, issues relating to a particular issuer or otherwise. Any such halt or suspension or limitation would result in the Fund being unable to sell the securities traded on that securities exchange and, accordingly, expose the Fund to losses and delays in the ability to liquidate assets in the Fund. In extreme liquidity conditions, redemptions in a Fund might need to be deferred or suspended.

The Funds generally deduct charges from the income produced from their investments; however, some may deduct all or part of their charges from capital (e.g. to allow higher levels of income to be paid).

Charges taken from the 'capital' of the fund may erode capital growth. Your capital could also decrease if income withdrawals exceed the growth rate of a Fund.

The Funds are valued using the latest available price for each underlying investment. These prices may not fully reflect changing market conditions. The Funds can apply a 'fair value price' to all or part of its portfolio to mitigate this risk.

The Funds conducts transactions with various counterparties and there is a risk that counterparty will not deliver an investment (for purchases by the Fund) or cash (for sales by the Fund) after the Fund has fulfilled its responsibilities. In the event of failure of the counterparty the Fund may only rank as an unsecured creditor in respect of sums due from the counterparty in question, meaning that the Fund may be unable to recover part or all of the assets exposed to that counterparty and any such recovery may be significantly delayed. Such delay or loss would be to the detriment of the value of the Fund.

The Funds may use derivatives for efficient portfolio management purposes. There is a risk that any counterparty used does not fulfil its obligations. The use of derivatives will increase the exposure of the Fund.

The Funds may use an overdraft facility. This will increase the exposure of the Fund.

The Funds do not currently permit the undertaking of stock lending in a Fund. If this were to change in the future this Prospectus will be reviewed and updated.

Past performance is not necessarily a guide to future performance.

As with any investment, inflation will reduce the real value (i.e. purchasing power) of the capital, and of any income provided, over time.

Any tax features of a Fund or your investment in a Fund are not guaranteed: they can change at any time and their value will depend on your circumstances.

Important Investment Notes (continued)

Fund liability risk: the Trust is structured as an umbrella fund with segregated liability between its Funds. The assets of one Fund will not be available to meet the liabilities of another. However, the Trust (through its Manager) may operate or have assets held on its behalf or be subject to claims in the UK, or in other jurisdictions whose courts may not necessarily recognise such segregation of liability. Therefore, it is not always possible to be certain that the assets of a Fund will always be completely isolated from the liabilities of another Fund of the Trust in every circumstance.

This document is provided solely to enable investors to make their own investment decisions. It is not personal advice. These investments are not suitable for everyone. If you are in any doubt about suitability, you should seek expert advice. Please ensure you read the full Key Investor Information before placing any investment instruction.

Authorised Status

The Trust is an authorised unit trust scheme established by a Trust Deed (the "Trust Deed") between the Trustee and Depositary and the Manager dated 10th October 2016. It was granted authorisation by order of the FCA on 10th October 2016.

The Trust is categorised as a "UCITS" for the purposes of the Rules. This means that units in a Trust are available for investment for all classes of investor in the UK and may obtain recognition under EC Council Directive 2009/65/EC for marketing in certain member states of the European Economic Area. At present the only EU member state in which a Fund is marketed to the public is the UK.

The Trust is structured as an umbrella unit trust, in that different funds may be established from time to time by the Manager with the approval of the FCA, the agreement of the Trustee, and in accordance with the Trust Deed. On the introduction of a new Fund, a revised Prospectus will be prepared setting out the relevant details of each Fund, such revised Prospectus to be approved by the Manager and filed with the Trustee and the FCA.

The assets of each Fund will be treated as separate from those of every other Fund and will be invested in accordance with the investment objective and policy attributable to that Fund. Investment of the assets of each Fund must comply with the Rules and the investment objective and policy of the relevant Fund.

Each Fund has a segregated portfolio to which that Fund's assets and liabilities are attributable. The assets of a Fund belong exclusively to that Fund and shall not be used or made available to discharge (directly or indirectly) the liabilities of, or claims against, any other person or body, including the Trust and any other Fund and shall not be available for any such purpose.

Subject to the above, each Fund will be charged with the liabilities, expenses, costs and charges of the Trust attributable to that Fund, and within each Fund charges will be allocated (if relevant) between classes of units of a particular Fund in accordance with the terms of issue of units of those classes. Any assets, liabilities, expenses, costs or charges not attributable to a particular Fund may be allocated by the Manager in a manner which it believes is fair to the unitholders generally. This will normally be pro rata to the net asset value of the relevant Funds.

The functional and presentation currency of the Trust is GBP.

Certification of the Financial Statements by Directors of the Manager

Fund Information

The Comparative Tables on pages 15 and 16 give the performance of each active unit class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables is calculated as the return after operating charges per unit divided by the opening net asset value per unit. It differs from the Fund's performance disclosed in the Manager's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

Risk and Reward Indicator ("RRI")

The Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

Fund Information

The Comparative Tables on pages 25 and 26 give the performance of each active unit class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables is calculated as the return after operating charges per unit divided by the opening net asset value per unit. It differs from the Fund's performance disclosed in the Manager's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

Manager's Investment Report

For the half year ended 31st March 2023

Investment objective

The investment objective of the Fund is to provide medium to long term capital growth through a combination of capital gains and income derived from an internationally diversified portfolio of equities.

Investment policy

The Fund may invest in equities across a broad range of markets globally. The Fund's investments are not confined to any particular geographic market or sector. The Fund is not constrained by a benchmark, nor does it target particular weightings for individual markets or sectors. The Manager anticipates that the Fund will typically invest in the world's major developed markets, being the UK, Europe, North America, Asia and Australasia. Where appropriate investment opportunities are available, the Manager may also invest the Fund in markets considered to be emerging markets, provided such markets are eligible markets.

The Manager shall target performance over the medium to long-term (3 years plus). The Manager's focus shall be on identifying well-financed companies with high quality business models, which the Manager believes will be capable of consistent growth.

The Fund may also invest in other transferable securities, warrants, other collective investment schemes, exchange traded funds, deposits, cash and near cash. The Fund may use derivative instruments and forward transactions for the limited purposes of efficient portfolio management, including hedging.

The Manager intends to manage the Fund in line with The Investment Association's Global Sector.

Fund Information

The Comparative Tables on pages 37 and 38 give the performance of each active unit class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables is calculated as the return after operating charges per unit divided by the opening net asset value per unit. It differs from the Fund's performance disclosed in the Manager's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

** Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

† Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.60%.

Risk and Reward Indicator ("RRI")

The Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.
