\* Applicable only to Class A shares. Class Z shares currently has 0% management charges.

The HL ICVC 1 (the "Company") is structured as an umbrella company, in that different sub-funds ("Fund") may be established from time to time by Hargreaves Lansdown Fund Managers Limited (the "ACD") with the approval of the Financial Conduct Authority (FCA).

The Company is a Non-UCITS Retail Scheme (NURS). The Company is also an Alternative Investment Fund (AIF).

The Depositary's fee is 0.01% of the net asset value of a Fund up to £100 million; 0.0075% of the net asset value of a Fund between £100 million and £1 billion; and 0.005% on balances greater than £1 billion, plus VAT.

The ACD is not permitted to levy a redemption charge or increase the rates of its initial or annual charges unless 60 days' prior written notice of the introduction of the new charge and the date of its commencement has been given to all shareholders and the Prospectus has been amended to reflect the change.

Full details of the underlying charges are set out in the Key Investor Information for the Company which is published on Hargreaves Lansdown's website, http://www.hl.co.uk/funds/hl-funds. Copies may be obtained from Hargreaves Lansdown Fund Managers Limited, Sunderland SR43 4AS or directly from the ACD - Hargreaves Lansdown Fund Managers Limited, One College Square South, Anchor Road, Bristol, BS1 5HL.

### **Share Price**

Shares in the Company are single priced. This means that (subject to any dilution adjustment and initial charge) the price of each share for both buying and selling purposes will be the same and determined by reference to the particular valuation point. The price of each share of any class will be calculated by reference to the proportion of the net asset value of the Fund attributable to shares of that class by:

- taking the proportion of the net asset value of the relevant Fund attributable to the shares of the class concerned at the valuation point of that Fund;
- dividing the result by the number of shares of the relevant class in issue immediately before the valuation point concerned; and
- increasing or decreasing the result by any dilution adjustment determined by the ACD.

The Funds are normally valued at close of business each day for the purpose of determining the share price. With the agreement of the Depositary the Funds may be valued at other times.

### **Dealing in Shares**

Dealing confirmations are issued for all purchases and sales of shares and will be posted within 24 hours of the next valuation point following receipt of your application.

The shares of the Company are non-certificated.

Shares may be sold back to the ACD at any time at the price applicable at the valuation point following receipt of instructions.

You will receive a dealing confirmation setting out the details and payment will follow, normally within two working days of receipt of the signed form of renunciation.

Daily prices are currently available from the Hargreaves Lansdown website (www.hl.co.uk), HL App (HL Live) and our Helpdesk on 0117 900 9000.

### **Cancellation Rights**

If you receive financial advice on a face-to-face basis regarding your investment, you will have a right to change your mind. If you receive financial advice on a non face-to-face basis, we will also allow you the right to cancel your investment. If you decide to cancel your contract during the 14 days after the date on which you receive a cancellation notice from us and the value of your investment has fallen at the time we receive your completed cancellation notice, you will not receive a full refund of your investment and an amount equal to any fall in value will be deducted from the sum you originally invested.

### **Taxation - Income**

Income earned by shareholders from the Company is liable to UK Income Tax at the rate applicable for the individual shareholders.

### **Fund Cross Holdings**

At the period end, the HL Balanced Managed Fund, HL Moderately Adventurous Managed Fund and HL Adventurous Managed Fund held 41,273,446 shares, 77,280,646 shares and 78,151,868 shares, respectively of HL US Fund.

### Fund Cross Holdings (continued)

At the period end, the HL Balanced Managed Fund and HL Moderately Adventurous Managed Fund held 56,308,842 shares and 34,984,968 shares, respectively of HL Global Corporate Bond Fund.

### **Taxation - Capital Gains**

There is no tax on capital gains within the Company. Gains realised on disposal of shares by shareholders who are UK resident for taxation purposes may be liable to Capital Gains Tax.

All taxation information in this Report is based on current legislation and may be subject to change. Any tax reliefs referred to are those currently applying. Their value depends on the individual circumstances of the shareholder.

### **Report and Scheme Particulars**

Copies of the Scheme Particulars and Interim and Annual Report and Financial Statements may be obtained from the ACD at the address shown at the beginning of this Report.

The maintenance and integrity of the Hargreaves Lansdown Plc website is the responsibility of the Directors; the work carried out by the Auditor does not involve consideration of these matters and, accordingly, the Auditor accepts no responsibility for any changes that may have occurred to the Financial Statements since they were initially presented on the website.

### Commission

Commission may be payable to authorised intermediaries, rates are available on request and details are set out on the dealing confirmation.

### Status

The ACD can only provide information on its own range of Company to retail clients.

### Assessment of Value

For each of its funds, Hargreaves Lansdown Fund Managers Limited (HLFM) published an Assessment of Value covering the financial year ended 30th September 2024 and this is available at www.hl.co.uk/funds/hl-funds/multi-manager-funds/other-documents.

## Important Investment Notes

You should be aware of the risks involved in investing in a Fund. These risk warnings must not be taken to be comprehensive, as new risks may arise in the future which could not have been anticipated in advance.

If you have any doubts over the suitability of a Fund please contact a financial adviser for advice.

- o The price of shares (and the income from them) can go down as well as up, and are not guaranteed. You may not receive back the amount you invest in a Fund.
- o An investment in a Fund is not intended to be a complete investment programme, which means that a Fund is intended to complement and form part of a wider portfolio of investments. Shares should be regarded by you as a long term (i.e. five or more years) investment.
- Past performance is not a guide to future performance. Each Fund's investment objective is an intended result but there is no guarantee that such a result will be achieved. There are no express or implied assurances as to the likelihood of achieving the Fund's investment objectives, as this will depend (in part) on evolving market conditions and the available investment opportunities over time.
- A Fund's net asset value can be influenced by factors such as stock market fluctuations, political and economic events, corporate earnings reports and catastrophic events. This means that in any particular period, the Fund may suffer losses and should not be regarded as a short term investment.
- o In extreme liquidity conditions, redemptions in the underlying assets, and/or a Fund itself, may need to be deferred or suspended.
- Economic factors such as changes in interest rates, inflation, deflation and supply and demand can affect the price of all investments, and so affect the value of your investment in a Fund. As with any investment, inflation will reduce the real value (i.e. purchasing power) of the capital over time.
- o All Funds are potentially exposed to adverse movements in equity, bond, commodity, currency and other market prices, indices or rates (market risk) or changes in the anticipated or calculated volatility of these movements (volatility risk). This could result in a Fund losing value.
- Operation risk: The operations of a Fund could be subject to human error, faulty processes or governance, or technological failures. Operational risks may subject a Fund to errors affecting valuation, pricing, accounting, tax reporting, financial reporting, custody and trading, among other things. Any such errors may have a negative impact on the return of your investments.
- o Regulatory and governance policy: The laws that govern a Fund may change in the future. Any such changes may not be in the best interest of the Company and may have a negative impact on the value of your investment.
- o Information Security: The use of the internet and other electronic media and technology exposes the Company, the Company's service providers, and their respective operations, to potential risks from information security attacks or incidents (collectively, "information-events"). Information events may include, for example, unauthorised access to systems, networks or devices (such as, for example, through "hacking" activity), infection from computer viruses or other malicious software code, and attacks which shut down, disable, slow or otherwise disrupt operations, business processes or website access or functionality. In addition to intentional information events, unintentional information events can occur, such as, for example, the Company and the Shareholders and cause a fund to incur financial loss and expense, as well as face exposure to regulatory penalties, reputational damage, and additional compliance costs associated with corrective measures.

### Important Investment Notes (continued)

- o Brexit and the European Union: The United Kingdom is no longer a member state of the European Union. Despite the negotiation of the UK-EU Trade and Cooperation Agreement in December 2020, the future economic and political relationship between the UK and the EU (and between the UK and other countries) remains uncertain in many respects, and a period of economic and political uncertainty may therefore continue in the UK and the EU. The relevant regulatory authorities in the UK may in the future make changes to their rules which deviate from the standards applicable in the EU. Such changes may be adverse to the ACD's ability to operate effectively and/or to the Fund. The on-going negotiations between the UK and the EU in respect of their relationship may lead to unpredictable outcomes, such as market volatility or impacting on certain asset classes. Other member states of the EU may also reconsider their EU membership. This could result in one or more other countries leaving the EU, or in major reforms or other changes being made to the EU or to the European. The nature and extent of the impact of these factors on the Fund, the ACD and the Investment Adviser(s) are uncertain, but may be significant.
- Effects of Health Crises and Other Catastrophic Events: Health crises, such as pandemic and 0 epidemic diseases, as well as other catastrophes such as natural disasters, war or civil disturbance, acts of terrorism, power outages and other unforeseeable and external events, that result in disrupted markets and/or interrupt the expected course of events, and public response to or fear of such crises or events, may have an adverse effect on the operations of and, where applicable investments made by the Company, the ACD and the Investment Adviser(s). For example, any preventative or protective actions taken by governments in respect to such crises or events may result in periods of regional, national or international business disruptions. Such actions may significantly disrupt the operations of the Company, the ACD, the Investment Adviser(s) and the other service providers to the ACD and/or the Company. Further, the occurrence and duration of such crises or events could adversely affect economies and financial markets either in specific countries or worldwide. The impact of such crises or events could lead to negative consequences for the Fund, including, without limitation, significant reduction in the Net Asset Value of a Fund, reduced liquidity of a Fund's investments, restrictions on the ability to value investments and the potential suspension of the calculation of the Net Asset Value and the suspension of issues, redemption and/or exchanges of shares.
- o The tax summary set out in Note 9 is believed to be accurate as at the date of the Prospectus. It is subject to change in the future. Investors should consider their own tax position which will depend on their personal circumstances and may therefore not be covered by the general tax summary set out above.
- o Certain Funds may deduct certain charges from capital rather than income. Whilst this policy may allow more income to be distributed to Shareholders, it may also have the effect of reducing capital and potential capital growth, as well as potentially increasing capital losses.
- o The Fund conducts transactions with various counterparties and there is a risk that a counterparty will not deliver an investment (for purchases by the Company for a Fund) or cash (for sales by the Fund) after the Company (in relation to a Fund) has fulfilled its responsibilities.

## **Authorised Status**

HL ICVC 1 (the "Company") is an investment company with variable capital incorporated in England and Wales under registered number IC055938 and authorised by the Financial Conduct Authority (FCA) with effect from 3rd November 2021. The Company's PRN is 963315. The Company has an unlimited duration.

The base currency of the Company and each Fund is Pound Sterling.

Shareholders are not liable for the debts of the Company. A Shareholder is not liable to make any further payment to the Company after they have paid the price on the purchase of the shares.

# Certification of the Financial Statements by Directors of the ACD

In accordance with the requirements of the Financial Conduct Authority's Collective Investment Schemes Sourcebook, we hereby certify the financial statements on behalf of the Directors of Hargreaves Lansdown Fund Managers Limited.

P A Dimambro (Director) 23rd May 2025 **T Vaughan** (Director)

# ACD's Investment Report

For the half year ended 31st March 2025

### Investment objective

The HL Growth Fund (the "Fund") aims to grow your investment over any 10-year period. The Fund also aims to maintain a level of risk ranging between 80% and 90% of the global stock market's volatility, as represented by the MSCI All Countries World Index (GBP Total Return, Net). The Fund's volatility is assessed at least monthly on a forward-looking basis but may not remain within the risk range. It could be higher or lower, for example during extreme market conditions.

### Investment policy

At least 90% of the Fund's net asset value will be invested in collective investment schemes (including regulated schemes and index tracking exchange traded funds), established in Europe and the UK, which aim to track the performance of various indices across a range of asset classes. It aims to do this by investing in assets which make up the relevant index. Such asset classes are:

- Equity securities globally (such as shares of large and small companies anywhere in the world)
- Fixed income securities (such as corporate bonds and government bonds, and both investment grade and non-investment grade issues)

The Fund can also invest, via collective investment schemes, in:

- Commodities
- Property

The Fund may from time to time also invest up to 10% of its net asset value in actively managed funds. The Fund may often be invested entirely in collective investment schemes (in regulated schemes) managed or operated by an Investment Adviser in seeking to achieve its investment objective, including investment of up to 100% of the Fund's net asset value in index tracking funds.

Due to the risk profile, the Fund's exposure to equities will typically range between 70% and 90% of its net asset value. However, there may be periods when the Fund's exposure to equities may be lower than 70% of the Fund's net asset value or higher than 90% of its net asset value due to market movements or in extraordinary market conditions (e.g., where there is not a steady and constant flow of investment activity and where there is high volatility and/or a lack of regular pricing information available).

The Fund may also invest directly or indirectly up to 10% in money market instruments, cash and near cash.

The Fund is actively managed and uses strategic asset allocation to determine the Fund's long term allocation to different asset classes through collective investment schemes. The Fund will blend asset classes for diversification, aiming to provide returns consistent with the Fund's risk profile and return aim. The strategic asset allocation will be adjusted periodically, to take into account revised assumptions around the expected return and risk of different asset classes, as well as changing market conditions.

### ACD's Investment Report (continued) For the half year ended 31st March 2025

### Investment policy (continued)

The Fund will invest at least 85% of its net asset value in collective investment schemes which seek to track indices in respect of which certain environmental, social and/or governance ("ESG") requirements apply. The nature and extent of such ESG requirements will vary depending on the specific indices such collective investment schemes seek to track. The ESG requirements may include the application of minimum ESG scoring or rating requirements (i.e. such that the assets comprised in the index should include a higher proportion of issuers that score well against a range of ESG criteria, and a lower proportion of issuers that do not), so called ESG tilted indices, and/or ESG exclusions (where selected securities are filtered out from an index based on ESG-related limits/thresholds), or the application of techniques to lower the carbon intensity of the index. The Fund may also invest up to 15% of its net asset value in collective investment schemes which seek to track indices in respect of which no specific ESG requirements apply. To enable the Fund to meet its investment objective, there may be periods when the Fund's investment in components which implement ESG techniques may be less than 85% of the Fund's net asset value. For example, due to market movements or in extraordinary market conditions.

The Fund may make use of exchange traded derivative instruments and foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

Where the Fund invests in assets through collective investment schemes, those schemes may use derivative instruments for efficient portfolio management or investment purposes.

The ACD may allocate all or a portion of the Fund's assets to an Investment Adviser. The Investment Adviser will use their own method for managing their allocation of the Fund's portfolio. The Investment Adviser will be subject to the ACD's oversight and the Fund's investment objective and policy. The ACD may choose to retain the investment management of some, or all, of the Fund's portfolio.

### **ESG** Allocation

Where possible we invest in tracker funds that apply exclusions criteria, while also tilting the portfolio towards companies that score well on certain ESG measures, and away from those that don't. As of 31st March 2025, the proportion of the HL Growth fund invested in funds that apply both exclusions and tilting was 85.18%. A further 10.55% applies exclusions only.

Some of the funds we invest in also track indices designed to achieve an annual reduction in carbon intensity, also referred to as a 'decarbonisation pathway'. As of 31st March 2025, 70.57% of the fund invests in funds that integrate a decarbonisation pathway.

4.27% of the fund does not apply any form of ESG integration.

The fund's approach to ESG integration can result in larger or smaller investments in individual companies compared to a portfolio that does not incorporate ESG factors. The following tables illustrate how the fund's exposures differ in relation to a non-ESG-integrated portfolio.

## ACD's Investment Report (continued)

For the half year ended 31st March 2025

### ESG Allocation (continued)

| Company Name      | % of non-ESG equivalent<br>portfolio | % HL Growth Fund's<br>Share portfolio | %<br>Increase |

# HL Growth Fund Fund Information

The Comparative Table on page 19 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

\*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases. There are no direct transaction costs applied to the trades executed on this Trust.

† Operating charges, otherwise known as the OCF is the ratio of the Trust's total disclosable costs (excluding overdraft interest) to the average net assets of the Trust. It includes the annual management fee as well as the administrative costs incurred by the Trust. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.10%.

## Fund Information (continued)

### Synthetic Risk and Reward Indicator ("SRRI")

| Lower Risk<br>Typically Lower Rewards |   |   |   | Typica |   | gher Risk<br>Rewards<br>₽ |  |
|---------------------------------------|---|---|---|--------|---|---------------------------|--|
| 1                                     | 2 | 3 | 4 | 5      | 6 | 7                         |  |

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

# ACD's Investment Report

For the half year ended 31st March 2025

### Investment objective

The HL US Fund (the "Fund") aims to grow your investment in excess of the total return of the MSCI USA Index (Net of 15% Withholding Tax) over rolling 5 year periods. The Fund's return aim is measured after the deduction of Fund charges.

### Investment policy

The Fund will invest its assets either directly, or indirectly via other collective investment schemes and exchange traded funds. At least 80% of the Fund will be invested in shares of US companies. These are companies which are incorporated, domiciled, or listed in the US.

The Fund may also invest up to 20% in shares of non-US companies, bonds (for example, loans to either a company or government that pay interest), in other transferable securities (including closed ended funds), money market instruments (for example, short term loans that pay interest), deposits, warrants and cash.

In order to achieve the investment objective of the Fund, the ACD will allocate all or a portion of the Fund's assets to one or more Investment Advisers. Each Investment Adviser will use its own methodology for managing its allocated portion of the Fund's portfolio, subject at all times to the ACD's oversight and the Fund's investment objective and policy. The ACD may, at its discretion, choose to retain the investment management of some or all of the Fund's portfolio.

The Fund may invest up to 15% of its assets via other collective investment schemes.

The Fund may make limited use of foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

The Fund is actively managed, which means the ACD or delegated Investment Adviser decides which investments to buy and sell and when. Investments are selected based on individual company research. The Fund will use a combination of strategies (including but not limited to growth, value and income) which the ACD believes together offer broad US equity market exposure and the potential for share price and/or dividend growth. Companies may be selected from any industry or economic sector, and there is no restriction on size.

### Performance review

Over the six-month period to 31st March 2025, the price of the accumulation shares remained the same at 126.16 pence. The Fund's overall performance is measured against the MSCI USA Index (Net of 15% Withholding Tax), which over the same period increased by 1.90%.

Over the period since launch on 1st November 2022 to 31st March 2025, the price of the accumulation shares rose from 100 pence to 126.16 pence representing an increase of 26.16%. Over the same period the target benchmark rose by 33.54%.

All Collective Investment Schemes are in accumulation shares/units unless otherwise stated.

~ Delisted security since 9th January 2023.

# HL US Fund Fund Information

The Comparative Table on pages 34 to 36 give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

† The Fund launched on 1st November 2022.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.73%.

01/11/22 to

† The Fund launched on 1st November 2022.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.33%.

† The Fund launched on 1st November 2022.

\*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

<sup>†</sup> Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.73%.

## Fund Information (continued)

### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 6 because funds of this type have experienced high rises and falls in value in the past.

The Fund's category is not guaranteed to remain the same and may change over time. The risk and reward rating remain the same from the last reporting period.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

# ACD's Investment Report

For the half year ended 31st March 2025

### Investment objective

The HL Balanced Managed Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 50% and 70% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

### Investment policy

The Fund will invest in a variety of asset classes globally. At least 80% of the Fund will be invested in assets through other collective investment schemes; it may also invest in assets directly. Such asset classes are: equity securities (such as shares), fixed income securities (such as corporate bonds and government bonds), commodities, gold, money market instruments, cash and near cash. The Fund may be exposed to both investment grade and non-investment grade fixed income securities.

Due to the risk profile, the expectation is that the Fund will typically have an exposure to shares in between 45% and 65%, however this is not guaranteed. To enable the Fund to meet its investment objective, the exposure to shares may be lower or higher than the stated range in extraordinary market conditions (where there is not a steady and constant flow of investment activity and where there is high volatility and a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Balanced" risk profile and return aim.

The Fund uses an asset allocation model which determines the Fund's allocation to the different asset classes based on a longer-term outlook. The Fund's asset allocation will be recalculated periodically taking into account the results of the model and market conditions.

At any time, the managers may also implement tactical changes to the asset allocation of the Fund to take advantage of short-term investment opportunities.

The collective investment schemes in which the Fund invests will include those managed or operated by the ACD, as well as those provided by third parties. The collective investment schemes will be established in Europe, UK, Jersey and Guernsey.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors and industries.

The Fund may make use of foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

Where the Fund invests in assets through collective investment schemes, those schemes may use derivative instruments for efficient portfolio management or investment purposes.

## ACD's Investment Report (continued)

For the half year ended 31st March 2025

### Performance review

Over the six-month period to 31st March 2025, the price of the accumulation shares fell from 114.12 pence to 113.97 pence representing a decrease of -0.13%. Over the same period the IA Mixed Investment 20-60% Shares peer group returned an average gain of 0.19%.

Over the period since launch on 8th March 2023 to 31st March 2025, the price of the accumulation shares rose from 100 pence to 113.97 pence representing an increase of 13.97%. Over the same period the comparator benchmark rose by 10.47%.

All investments are in accumulation shares/units unless otherwise stated.

~ Related party holding.

## **Fund Information**

The Comparative Table on page 46 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

† The Fund launched on 8th March 2023.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2023 is an annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.83%

### Fund Information (continued)

### Synthetic Risk and Reward Indicator ("SRRI")

| Lower Risk<br>Typically Lower Rewards |   | wards | Higher Risk<br>ds Typically Higher Rewards |   |   | • |
|---------------------------------------|---|-------|--|---|---|---|
| 1                                     | 2 | 3     | 4  | 5 | 6 | 7 |

The Fund is ranked at 4 because funds of this type have experienced moderate rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

## Notes to the Financial Statements

(Unaudited) for the half year ended 31st March 2025

### **Accounting Policies**

The accounting policies applied are consistent with the most recent annual Financial Statements.

### **Basis of Preparation**

The Financial Statements have been prepared in accordance with the historical cost convention, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Association, in May 2014 and amended in June 2017.

## **Distribution Tables**

(Unaudited) for the half year ended 31st March 2025

### In pence per share

### Interim accumulation for the period ended 31st March 2025

Group 2 - Shares created on or after 1st October 2024

## **ACD's Investment Report**

For the half year ended 31st March 2025

### Investment objective

The HL Moderately Adventurous Managed Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 70% and 90% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

### Investment policy

The Fund will invest in a variety of asset classes globally. At least 80% of the Fund will be invested in assets through other collective investment schemes; it may also invest in assets directly.

Such asset classes are: equity securities (such as shares), fixed income securities (such as corporate bonds and government bonds), commodities, gold, money market instruments, cash and near cash. The Fund may be exposed to both investment grade and non-investment grade fixed income securities.

Due to the risk profile, the expectation is that the Fund will typically have an exposure to shares in between 65% and 85%, however this is not guaranteed. To enable the Fund to meet its investment objective, the exposure to shares may be lower or higher than the stated range in extraordinary market conditions (where there is not a steady and constant flow of investment activity and where there is high volatility and a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Moderately Adventurous" risk profile and return aim.

The Fund uses an asset allocation model which determines the Fund's allocation to the different asset classes based on a longer-term outlook. The Fund's asset allocation will be recalculated periodically taking into account the results of the model and market conditions.

At any time, the managers may also implement tactical changes to the asset allocation of the Fund to take advantage of short-term investment opportunities.

The collective investment schemes in which the Fund invests will include those managed or operated by Hargreaves Lansdown Fund Managers Ltd., as well as those provided by third parties. The collective investment schemes will be established in Europe, UK, Jersey and Guernsey.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors and industries.

The Fund may make use of foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

Where the Fund invests in assets through collective investment schemes, those schemes may use derivative instruments for efficient portfolio management or investment purposes.

## ACD's Investment Report (continued)

For the half year ended 31st March 2025

### Performance review

Over the six-month period to 31st March 2025, the price of the accumulation shares rose from 115.97 pence to 116.06 pence representing an increase of 0.08%. Over the same period the IA Mixed Investment 40-85% Shares peer group returned an average of -0.03%.

Over the period since launch on 8th March 2023 to 31st March 2025, the price of the accumulation shares rose from 100 pence to 116.06 pence representing an increase of 16.06%. Over the same period the comparator benchmark rose by 11.54%.

~ Related party holding.

## Fund Information

The Comparative Table on page 56 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Tables is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the Manager's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

† The Fund launched on 8th March 2023.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.86%.

# HL Moderately Adventurous Managed Fund Fund Information (continued)

### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 5 because funds of this type have experienced moderate rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

## **HL Adventurous Managed Fund**

# ACD's Investment Report

For the half year ended 31st March 2025

### Investment objective

The investment objective of the HL Adventurous Managed Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 90% and 110% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

### Investment policy

The Fund will invest in a variety of asset classes globally. At least 80% of the Fund will be invested in assets through other collective investment schemes; it may also invest in assets directly. Such asset classes are: equity securities (such as shares), fixed income securities (such as corporate bonds and government bonds), commodities, gold, money market instruments, cash and near cash. The Fund may be exposed to both investment grade and non-investment grade fixed income securities.

Due to the risk profile, the expectation is that the Fund will typically have an exposure to shares in between 85% and 100%, however this is not guaranteed. To enable the Fund to meet its investment objective, the exposure to shares may be lower or higher than the stated range in extraordinary market conditions (where there is not a steady and constant flow of investment activity and where there is high volatility and a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Adventurous" risk profile and return aim.

The Fund uses an asset allocation model which determines the Fund's allocation to the different asset classes based on a longer-term outlook. The Fund's asset allocation will be recalculated periodically taking into account the results of the model and market conditions.

At any time, the managers may also implement tactical changes to the asset allocation of the Fund to take advantage of short-term investment opportunities.

The collective investment schemes in which the Fund invests will include those managed or operated by the ACD, as well as those provided by third parties. The collective investment schemes will be established in Europe, UK, Jersey and Guernsey.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors and industries.

The Fund may make use of foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

Where the Fund invests in assets through collective investment schemes, those schemes may use derivative instruments for efficient portfolio management or investment purposes.

## HL Adventurous Managed Fund

## ACD's Investment Report (continued)

For the half year ended 31st March 2025

### Performance review

Over the six-month period to 31st March 2025, the price of the accumulation shares fell from 118.07 pence to 117.99 pence representing a decrease of -0.07%. Over the same period the IA Global peer group returned an average of -1.35%.

Over the period since launch on 8th March 2023 to 31st March 2025, the price of the accumulation shares rose from 100 pence to 117.99 pence representing an increase of 17.99%. Over the same period the comparator benchmark rose by 13.49%.

# **Fund Information**

The Comparative Table on page 66 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

† The Fund launched on 8th March 2023.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2023 is an annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.88%.

### Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

### **ACD's Investment Report**

For the half year ended 31st March 2025

#### Investment Objective

The HL Global Corporate Bond Fund (the "Fund") aims to grow your investment in excess of the total return of the ICE BofA Global Corporate Index TR (GBP-hedged) over rolling 5-year periods. The Fund's return aim is measured after the deduction of Fund charges.

#### Investment policy

The Fund will invest its assets either directly, or indirectly via other collective investment schemes and exchange traded funds. At least 80% of the Fund must be invested in corporate bonds rated investment grade. A bond will be considered investment grade where it has been independently rated as "investment grade" with a credit rating of at least BBB-/Baa3.

The Fund may also invest up to 20% in non-investment grade corporate bonds, sovereign bonds, sub sovereign bonds, asset-backed securities, high-yield bonds, unrated bonds, contingent convertible securities, money market instruments (for example, short term loans that pay interest), deposits and cash. The Fund's investment in contingent convertible securities will be restricted to no more than 10%.

In order to achieve the investment objective of the Fund, the ACD will allocate all or a portion of the Fund's assets to one or more Investment Advisers. Each Investment Adviser will use its own methodology for managing its allocated portion of the Fund's portfolio, subject at all times to the ACD's oversight and the Fund's investment objective and policy. The ACD may, at its discretion, choose to retain the investment management of some or all of the Fund's portfolio.

The Fund may invest up to 15% of its assets via other collective investment schemes.

The Fund may use exchange traded derivative instruments and foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost). On giving 60 days' notice to Shareholders, the Fund may, in addition to its other investment powers, use derivatives and forward transactions for investment purposes.

At least 90% of the Fund will be denominated in, or hedged back to, sterling.

The Fund is actively managed, which means the ACD or delegated Investment Adviser decides which investments to buy and sell and when. The ACD or Investment Adviser will use a combination of approaches to deliver the Fund's objective. These will include, but are not limited to, making high conviction (strong belief) investments at both a company and sector level, making investments based on their economic outlook or based on themes they expect to influence markets, and making investment in response to short-term market moves. The ACD or Investment Adviser will focus on identifying what they judge to be higher quality corporate bonds through assessment of the risks and business strengths associated with the underlying companies, the views of independent risk rating agencies, the valuation of the bonds relative to the market, and any other relevant factors. The Fund will also include some lower quality corporate bonds which may introduce more risk for the Fund but which offer the potential for diversification benefits and opportunities for performance.

#### Performance review

Over the six-month period to 31st March 2025, the price of the accumulation shares rose from 110.72 pence to 110.89 pence representing an increase of 0.15%. Over the same period, the ICE BofA Corporate TR Index returned 0.26% and the IA Global Corporate Bond sector peer group returned an average gain of 0.70%.

Over the period since launch on 20th July 2023 to 31st March 2025, the price of the accumulation shares has increased from 100 pence to 110.89 pence, an increase of 10.89%. Over the same period, the ICE BofA Corporate TR Index returned 10.52% and the IA Global Corporate Bond sector peer group returned an average of 9.79%.

# **Fund Information**

The Comparative Table on pages 126 to 129 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

† The Fund launched on 11th July 2023.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2023 is the annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.61%.

11/07/22+0

† The Fund launched on 11th July 2023.

\*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.

† Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2023 is the annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.21%.

### Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

| Lower Ri  |   | Higher I                          |   |   | gher Risk |   |
|-----------|---|-----------------------------------|---|---|-----------|---|
| Typically |   | ver Rewards Typically Higher Rewa |   |   | Rewards   |   |
| 1         | 2 | 3                                 | 4 | 5 | 6         | 7 |

The Fund is ranked at 4 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's category is not guaranteed to remain the same and may change over time. The risk and reward rating remain the same from the last reporting period.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

### ACD's Investment Report

For the half year ended 31st March 2025

#### Investment objective

The HL Multi-Index Cautious Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 30% and 50% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the 30-50% risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

#### Investment policy

At least 90% of the Fund's net asset value will be invested in collective investment schemes which aim to track the performance of various indices by investing in assets which make up the relevant index. Such asset classes are: equity securities (such as shares of companies), fixed income securities (such as corporate bonds and government bonds), commodities, and gold. The Fund may be exposed to both investment grade and noninvestment grade fixed income securities.

The Fund may from time to time also invest up to 10% of its net asset value in actively managed funds.

The Fund may also invest directly or indirectly up to 10% in money market instruments, cash and near cash.

The Fund may often invest entirely in collective investment schemes (including both regulated and unregulated schemes) managed or operated by an Investment Adviser in seeking to achieve its investment objective. This includes investment of up to 100% of the Fund's net asset value in index tracking funds (including index tracking exchange traded funds) which are designed to replicate the performance of an index. The collective investment schemes will be established in Europe and the UK.

Due to the risk profile, the Fund's exposure to equities will typically range between 20% and 40% of its net asset value. However, there may be periods when the Fund's exposure to equities may be lower than 20% of the Fund's net asset value or higher than 40% of its net asset value due to market movements or in extraordinary market conditions (e.g., where there is not a steady and constant flow of investment activity and where there is high volatility and/or a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Cautious" risk profile and return aim.

As part of the investment process, the ACD will use strategic asset allocation to determine the Fund's longerterm allocation to different asset classes. The strategic asset allocation will be adjusted periodically, to take into account revised assumptions around the expected return and risk of different asset classes, as well as changing market conditions.

In seeking to improve the Fund's performance, or reduce risk, the ACD may also engage in tactical asset allocation decisions. This involves adjusting the Fund's allocations to take advantage of shorter-term market trends, market forecasts, or economic conditions.

A minimum of 70% of the equities and corporate bonds in this fund, held through collective investment schemes, will adhere to the following exclusions:

• Companies involved in the manufacture of controversial weapons (including nuclear weapons);

• Violators of the UN Global Compact Principles; and

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

### ACD's Investment Report (continued)

For the half year ended 31st March 2025

#### Investment policy (continued)

This Fund invests at least 40% of its net asset value in collective investment schemes which have exposure to equities and corporate bonds. This means that at least 28% of this Fund's net asset value will be invested in collective investment schemes which apply the exclusions referred to above.

At least 10% of those collective investment schemes applying the exclusions referred to will go further, also excluding companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

To enable this Fund to meet its investment objective, there may be periods when this Fund has less than 40% of its net asset value invested in collective investment schemes which have exposure to equity securities and corporate bonds due to market movements or in extraordinary market conditions.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors, and industries.

#### **ESG** Allocation

A minimum of 70% of the equities and corporate bonds in the HL Multi-Index Cautious Fund, held through third-party funds, will adhere to the following 'baseline' exclusions:

- Companies involved in the manufacture of controversial weapons (including nuclear weapons);
- Violators of the UN Global Compact Principles; and

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

At least 10% of those tracker funds will go further, applying additional exclusions such as companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

The Fund invests at least 40% of its net asset value in funds which have exposure to equities and corporate bonds. This means that at least 28% of the HL Multi-Index Cautious Fund's net asset value will invest in funds which apply the 'baseline' exclusions.

As of 31st March 2025, the proportion invested in funds that apply the 'baseline' exclusions criteria was 48.69%, while 16.79% applied the additional exclusions.

#### Performance review

Over the six-month period to 31st March 2025, the price of the A accumulation shares rose from 103.73 pence to 103.86 pence representing an increase of 0.13%. Over the same period its comparator benchmark, IA Mixed Investment 0-35% Shares peer group returned 0.22%.

Since the launch of HL Multi-Index Cautious A Class shares on 6th June 2024 to 31st March 2025, the price of the accumulation shares rose from 100 pence to 103.86 pence representing an increase of 3.86%. Over the same period the IA Mixed Investment 0-35% Shares peer group returned an average gain of 2.97%.

The percentages in brackets show the equivalent sector comparatives as at 30th September 2024. All Collective Investment Schemes are in accumulation shares/units unless otherwise stated.

### **Fund Information**

The Comparative Table on pages 148 and 149 give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

‡ The Fund's Share Class A Accumulation was launched on 6th June 2024.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2024 is the annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.30%.

### Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 4 because funds of this type have experienced moderate rises and falls in value in the past.

The Fund's category is not guaranteed to remain the same and may change over time. The risk and reward rating remain the same from the last reporting period.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

### **ACD's Investment Report**

For the half year ended 31st March 2025

#### Investment objective

The HL Multi-Index Moderately Adventurous Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 70% and 90% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the 70-90% risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

#### Investment policy

At least 90% of the Fund's net asset value will be invested in collective investment schemes which aim to track the performance of various indices by investing in assets which make up the relevant index. Such asset classes are: equity securities (such as shares of companies), fixed income securities (such as corporate bonds and government bonds), commodities, and gold. The Fund may be exposed to both investment grade and noninvestment grade fixed income securities.

The Fund may from time to time also invest up to 10% of its net asset value in actively managed funds.

The Fund may also invest directly or indirectly up to 10% in money market instruments, cash and near cash.

The Fund may often invest entirely in collective investment schemes (including both regulated and unregulated schemes) managed or operated by an Investment Adviser in seeking to achieve its investment objective. This includes investment of up to 100% of the Fund's net asset value in index tracking funds (including index tracking exchange traded funds) which are designed to replicate the performance of an index. The collective investment schemes will be established in Europe and the UK.

Due to the risk profile, the Fund's exposure to equities will typically range between 65% and 85% of its net asset value. However, there may be periods when the Fund's exposure to equities may be lower than 65% of the Fund's net asset value or higher than 85% of its net asset value due to market movements or in extraordinary market conditions (e.g., where there is not a steady and constant flow of investment activity and where there is high volatility and/or a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Moderately Adventurous" risk profile and return aim.

As part of the investment process, the ACD will use strategic asset allocation to determine the Fund's longerterm allocation to different asset classes. The strategic asset allocation will be adjusted periodically, to take into account revised assumptions around the expected return and risk of different asset classes, as well as changing market conditions.

In seeking to improve the Fund's performance, or reduce risk, the ACD may also engage in tactical asset allocation decisions. This involves adjusting the Fund's allocations to take advantage of shorter-term market trends, market forecasts, or economic conditions.

A minimum of 70% of the equities and corporate bonds in this fund, held through collective investment schemes, will adhere to the following exclusions:

- Companies involved in the manufacture of controversial weapons (including nuclear weapons);
- Violators of the UN Global Compact Principles; and

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

### ACD's Investment Report (continued)

For the half year ended 31st March 2025

The Fund invests at least 70% of its net asset value in collective investment schemes which have exposure to equities and corporate bonds. This means that at least 49% of the Fund's net asset value will be invested in collective investment schemes which apply the exclusions referred to above.

At least 20% of those collective investment schemes applying the exclusions referred to will go further, also excluding companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

To enable the Fund to meet its investment objective, there may be periods when the equity and corporate bond investment may be less than 70% of the Fund's net asset value due to market movements or in extraordinary market conditions.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors, and industries.

The Fund may make use of exchange traded derivative instruments and foreign exchange forward transactions for the purposes of efficient portfolio management, including hedging (these are methods of managing the Fund in a way that is designed to reduce risk or cost).

Where the Fund invests in assets through collective investment schemes, those schemes may use derivative instruments for efficient portfolio management or investment purposes.

With a view to achieving the Fund's investment objective, the ACD may allocate all or a portion of the Fund's assets to an Investment Adviser. An Investment Adviser will use its own methodology for managing its allocated portion of the Fund's portfolio, subject, at all times, to the ACD's oversight and the Fund's investment objective and investment policy as described above. The ACD may, at its discretion choose to retain the investment management of some, or all, of the Fund's portfolio.

#### **ESG** Allocation

A minimum of 70% of the equities and corporate bonds in the HL Multi-Index Moderately Adventurous fund, held through third-party funds, will adhere to the following 'baseline' exclusions:

• Companies involved in the manufacture of controversial weapons (including nuclear weapons)

• Violators of the UN Global Compact Principles

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

At least 20% of those tracker funds will go further, applying additional exclusions such as companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

The Fund invests at least 70% of its net asset value in funds which have exposure to equities and corporate bonds. This means that at least 49% of the HL Multi-Index Moderately Adventurous fund's net asset value will invest in funds which apply the 'baseline' exclusions.

As of 31st March 2025, the proportion invested in funds that apply the 'baseline' exclusions criteria was 71.80%, while 57.05% applied the additional exclusions.

The percentages in brackets show the equivalent sector comparatives as at 30th September 2024.

All Collective Investment Schemes are in accumulation shares/units unless otherwise stated. † Income shares/units.

### HL Multi-Index Moderately Adventurous Fund Fund Information

The Comparative Table on pages 163 and 164 give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

06/06/21 to

† The Share class launched on 6th June 2024.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2024 is an annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.30%.

### HL Multi-Index Moderately Adventurous Fund Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

### HL Multi-Index Balanced Fund

### ACD's Investment Report

For the half year ended 31st March 2025

#### Investment objective

The HL Multi-Index Balanced Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 50% and 70% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the 50-70% risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

#### Investment policy

At least 90% of the Fund's net asset value will be invested in collective investment schemes which aim to track the performance of various indices by investing in assets which make up the relevant index. Such asset classes are: equity securities (such as shares of companies), fixed income securities (such as corporate bonds and government bonds), commodities, and gold. The Fund may be exposed to both investment grade and noninvestment grade fixed income securities.

The Fund may from time to time also invest up to 10% of its net asset value in actively managed funds.

The Fund may also invest directly or indirectly up to 10% in money market instruments, cash and near cash.

The Fund may often invest entirely in collective investment schemes (including both regulated and unregulated schemes) managed or operated by an Investment Adviser in seeking to achieve its investment objective. This includes investment of up to 100% of the Fund's net asset value in index tracking funds (including index tracking exchange traded funds) which are designed to replicate the performance of an index.

The collective investment schemes will be established in Europe and the UK.

Due to the risk profile, the Fund's exposure to equities will typically range between 45% and 65% of its net asset value. However, there may be periods when the Fund's exposure to equities may be lower than 45% of the Fund's net asset value or higher than 65% of its net asset value due to market movements or in extraordinary market conditions (e.g., where there is not a steady and constant flow of investment activity and where there is high volatility and/or a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Balanced" risk profile and return aim.

As part of the investment process, the ACD will use strategic asset allocation to determine the Fund's longerterm allocation to different asset classes. The strategic asset allocation will be adjusted periodically, to take into account revised assumptions around the expected return and risk of different asset classes, as well as changing market conditions.

In seeking to improve the Fund's performance, or reduce risk, the ACD may also engage in tactical asset allocation decisions. This involves adjusting the Fund's allocations to take advantage of shorter-term market trends, market forecasts, or economic conditions.

A minimum of 70% of the equities and corporate bonds in this Fund, held through collective investment schemes, will adhere to the following exclusions:

- Companies involved in the manufacture of controversial weapons (including nuclear weapons);
- Violators of the UN Global Compact Principles; and
- Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

### **HL Multi-Index Balanced Fund**

### ACD's Investment Report (continued)

For the half year ended 31st March 2025

#### Investment policy (continued)

This Fund invests at least 60% of its net asset value in collective investment schemes which have exposure to equities and corporate bonds. This means that at least 42% of this Fund's net asset value will be invested in collective investment schemes which apply the exclusions referred to above.

At least 15% of those collective investment schemes applying the exclusions referred to will go further, also excluding companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

To enable the Fund to meet its investment objective, there may be periods when this Fund has less than 60% of its net asset value invested in collective investment schemes which have exposure to equity securities and corporate bonds due to market movements or in extraordinary market conditions.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors, and industries.

#### **ESG** Allocation

A minimum of 70% of the equities and corporate bonds in the HL Multi-Index Balanced fund, held through third-party funds, will adhere to the following 'baseline' exclusions:

- Companies involved in the manufacture of controversial weapons (including nuclear weapons)
- Violators of the UN Global Compact Principles
- Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

At least 15% of those tracker funds will go further, applying additional exclusions such as companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

The Fund invests at least 60% of its net asset value in funds which have exposure to equities and corporate bonds. This means that at least 42% of the HL Multi-Index Balanced fund's net asset value will invest in funds which apply the 'baseline' exclusions.

As at 31st March 2025, the proportion invested in funds that apply the 'baseline' exclusions criteria was 65.69%, while 36.39% applied the additional exclusions.

#### Performance review

Over the six month period to 31st March 2025, the price of the accumulation shares rose from 103.21 pence to 103.50 pence representing an increase of 0.28%. Over the same period, its comparator benchmark, IA Mixed Investment 20-60% Shares peer group returned 0.19%.

Over the period since launch on 6th June 2024 to 31st March 2025, the price of the accumulation shares rose from 100.00 pence to 103.50 pence representing an increase of 3.50%. Over the same period, the IA Mixed Investment 20-60% Shares peer group returned an average gain of 2.79%.

The percentages in brackets show the equivalent sector comparatives as at 30th September 2024. All Collective Investment Schemes are in accumulation shares/units unless otherwise stated.

# **Fund Information**

The Comparative Table on page 178 give the performance of each active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

- ‡ The Fund launched on 6th June 2024.
- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- <sup>†</sup> Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2024 is the annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.30%.

## Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 4 because funds of this type have experienced moderate rises and falls in value in the past.

The Fund's category is not guaranteed to remain the same and may change over time. The risk and reward rating remain the same from the last reporting period.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

# **ACD's Investment Report**

For the half year ended 31st March 2025

#### Investment objective

The HL Multi-Index Adventurous Fund (the "Fund") aims to maximise total returns for a specified level of risk ranging between 90% and 110% of the forecasted long-term volatility of global equities as represented by the MSCI All Countries World Index (GBP Total Return, Net) over rolling 5-year periods.

The Fund's volatility is assessed using forecasted volatility figures at least monthly. The Fund's volatility may not remain within the 90-110% risk range and, accordingly, there may be periods, for example in extreme market conditions, when the Fund's volatility either exceeds or falls below this range.

#### Investment policy

At least 90% of the Fund's net asset value will be invested in collective investment schemes which aim to track the performance of various indices by investing in assets which make up the relevant index. Such asset classes are: equity securities (such as shares of companies), fixed income securities (such as corporate bonds and government bonds), commodities, and gold. The Fund may be exposed to both investment grade and noninvestment grade fixed income securities.

The Fund may from time to time also invest up to 10% of its net asset value in actively managed funds.

The Fund may also invest directly or indirectly up to 10% in money market instruments, cash and near cash.

The Fund may often invest entirely in collective investment schemes (including both regulated and unregulated schemes) managed or operated by an Investment Adviser in seeking to achieve its investment objective. This includes investment of up to 100% of the Fund's net asset value in index tracking funds (including index tracking exchange traded funds) which are designed to replicate the performance of an index.

The collective investment schemes will be established in Europe and the UK.

Due to the risk profile, the Fund's exposure to equities will typically range between 85% and 100% of its net asset value. However, there may be periods when the Fund's exposure to equities may be lower than 85% of the Fund's net asset value due to market movements or in extraordinary market conditions (e.g., where there is not a steady and constant flow of investment activity and where there is high volatility and/or a lack of regular pricing information available).

The Fund is actively managed and uses a mixture of asset allocation techniques to blend asset classes for diversification, aiming to provide returns consistent with the Fund's "Adventurous" risk profile and return aim.

As part of the investment process, the ACD will use strategic asset allocation to determine the Fund's longerterm allocation to different asset classes. The strategic asset allocation will be adjusted periodically, to take into account revised assumptions around the expected return and risk of different asset classes, as well as changing market conditions.

In seeking to improve the Fund's performance, or reduce risk, the ACD may also engage in tactical asset allocation decisions. This involves adjusting the Fund's allocations to take advantage of shorter-term market trends, market forecasts, or economic conditions.

A minimum of 70% of the equities and corporate bonds in this Fund, held through collective investment schemes, will adhere to the following exclusions:

• Companies involved in the manufacture of controversial weapons (including nuclear weapons);

• Violators of the UN Global Compact Principles; and

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

# ACD's Investment Report (continued)

For the half year ended 31st March 2025

This Fund invests 99% of its net asset value in collective investment schemes which have exposure to equities and corporate bonds. This means that at least 69% of this Fund's net asset value will be invested in collective investment schemes which apply the exclusions referred to above.

At least 25% of those collective investment schemes applying the exclusions referred to will go further, also excluding companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

To enable this Fund to meet its investment objective, there may be periods when this Fund has less than 99% of its net asset value invested in collective investment schemes which have exposure to equity securities and corporate bonds due to market movements or in extraordinary market conditions.

Subject to the requirements above, the Fund aims to meet its objective by diversifying across different asset classes, geographies, sectors, and industries.

#### **ESG** Allocation

A minimum of 70% of the equities and corporate bonds in the HL Multi-Index Adventurous fund, held through third-party funds, will adhere to the following 'baseline' exclusions:

- Companies involved in the manufacture of controversial weapons (including nuclear weapons)
- Violators of the UN Global Compact Principles

• Companies with a specified revenue exposure to: oil sands extraction, and thermal coal extraction and power generation.

At least 25% of those tracker funds will go further, applying additional exclusions such as companies or bond issuers involved in activities like tobacco, alcohol, gambling, adult entertainment, the production of civilian firearms and genetically modified organisms.

The Fund invests at least 99% of its net asset value in funds which have exposure to equities and corporate bonds. This means that at least 69% of the HL Multi-Index Adventurous fund's net asset value will invest in funds which apply the 'baseline' exclusions.

As at 31 March 2025, the proportion invested in funds that apply both the baseline and additional exclusions criteria was 73.15%.

The percentages in brackets show the equivalent sector comparatives as at 30th September 2024.

# **Fund Information**

The Comparative Table on page 189 gives the performance of the active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

06/06/2021 to

‡ The Fund launched on 6th June 2024.

- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The comparative period ending 30th September 2024 is an annualised figure due to share class being launched less than 1 year. The annualised OCF for the current period is 0.30%.

# Fund Information (continued)

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's risk category has been calculated using historical data, which may not be a reliable indication of the future risk profile of the Fund. The risk and reward rating remain the same from the last reporting period.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.

### Notes to the Financial Statements (Unaudited) for half year ended 31st March 2025

#### **Accounting Policies**

The accounting policies applied are consistent with the most recent annual Financial Statements.

#### **Basis of Preparation**

The Financial Statements have been prepared in accordance with the historical cost convention, as modified by the revaluation of investments, and in accordance with the Statement of Recommended Practice for UK Authorised Funds issued by The Investment Association, in May 2014 and amended in June 2017.

Group 2 - Shares created on or after 1st October 2024

<sup>‡</sup> There are no comparative figures shown as the Fund launched on 6th June 2024.

#### ACD's Investment Report For the period from 29th October 2024 to 31st March 2025

#### Investment objective

The HL Global Equity Income Fund (the "Fund") aims to:

- 1. Distribute an annual income of at least 90% of the gross income of the MSCI All Country World Index measured at the Fund's year end; and 100% measured on a 3-year rolling basis.
- 2. Generate a greater total return than the average performance of funds in the Investment Association Global Equity Income sector over any 5-year period. Returns are measured after the deduction of the Fund's charges.

#### Investment policy

At least 80% of the Fund will be invested in or exposed to shares of companies from developed market countries. Developed market countries are defined according to the MSCI Developed Markets Indices. The investment will be diversified across geographic regions.

The Fund may also invest in, or have exposure to, up to 20% in:

- Shares of companies from countries not included in the MSCI Developed Markets Indices (for example, non-developed market countries such as frontier markets countries and emerging market countries as defined by the MSCI Frontier Markets Indices and MSCI Emerging Markets Indices);
- Money market instruments (for example, short term loans that pay interest); and
- Deposits and cash.

The shares of companies from developed and non-developed countries may be accessed through depositary receipts, which allow investors to hold equity shares of foreign companies without the need to trade directly on a foreign market.

The Fund will invest a minimum of 85% of its assets directly. It may also invest up to 15% via other regulated collective investment schemes.

The collective investment schemes in which the fund may invest can take a variety of forms. They may be:

- Open or closed-ended
- Exchange traded (ETFs)
- Actively managed or passively managed
- Money market funds.

They may be managed or operated by the ACD or other third-party managers, and will be established in Europe, the UK, Jersey, or Guernsey.

The ACD will allocate all or a portion of the Fund's assets to one or more Investment Advisers. Each Investment Adviser will use its own method for managing its allocation. Investment Advisers will always be subject to the ACD's oversight and the Fund's investment objective and policy. The ACD may choose to retain the investment management of some or all of the Fund's portfolio.

The Fund may make use of derivative instruments and foreign exchange forward transactions for the purposes of efficient portfolio management (EPM) including "hedging" techniques. EPM and the hedging techniques used, aim to reduce the risks or costs of managing the Fund.

Where the Fund invests in other collective investment schemes, those schemes may use derivative instruments for EPM or investment purposes.

# ACD's Investment Report (continued)

For the period from 29th October 2024 to 31st March 2025

#### Investment policy (continued)

The Fund is actively managed. This means the ACD or delegated Investment Adviser(s) decides which investments to buy and sell, and when. The Fund invests in companies which the ACD or Investment Adviser(s) believes to offer:

- Above average income generation potential; and/or
- The potential for share price and/or dividend growth.

The ACD may also invest in passive funds where:

- Small market size would make active management inefficient;
- The size of the Fund's investment in the particular market is small;
- There is limited choice of active managers in that market;
- The cost of investment in an active fund would be prohibitive; or
- For liquidity or risk management purposes.

The Fund's total exposure to shares of companies from developed market countries is not guaranteed. There may be periods when the exposure is below 80% of the Fund's value. This may be due to market movements or in extraordinary market conditions. For example, where there is not a steady and constant flow of investment activity or where there is high volatility and a lack of regular pricing information.

#### Performance review

Since close of the initial offer period (7th November 2024) to 31st March 2025, the price of the accumulation shares decreased from 100 pence to 97.33 pence, a fall of -2.67%. Over the same period, the MSCI World index returned an average of -3.00% and the IA Global Equity Income peer group returned an average of -0.20%.

There are no comparative figures shown as the Fund launched on 29th October 2024.

All Collective Investment Schemes are in accumulation shares/units unless otherwise stated.

# **Fund Information**

The Comparative Table on pages 206 to 208 give the performance of the only active share class in the Fund.

The 'Return after charges' disclosed in the Comparative Table is calculated as the return after operating charges per share divided by the opening net asset value per share. It differs from the Fund's performance disclosed in the ACD's Investment report, which is calculated based on the latest published price.

Portfolio transaction costs are incurred when investments are bought or sold by a Fund in order to achieve the investment objective. These transaction costs affect an investor in different ways depending on whether they are joining, leaving or continuing with their investment in the Fund.

Direct transaction costs include broker commission and taxes. Broker commission includes the fee paid to a broker to execute the trades.

In addition, there are indirect portfolio transaction costs arising from the 'dealing spread' – the difference between the buying and selling prices of underlying investments in the portfolio. Unlike shares whereby broker commissions and stamp duty are paid by the Fund on each transaction, other types of investments (such as bonds, money instruments, derivatives, collective investment schemes) do not have separately identifiable transaction costs; these costs form part of the dealing spread. Dealing spreads vary considerably depending on the transaction value and money market sentiment.

| Highest mid price<br>Lowest mid price   | 105.70<br>96.68                        |

- † The Fund launched on 29th October 2024.
- \*\* Direct transaction costs are stated after deducting the proportion of the amounts collected from dilution adjustments/dilution levies that relate to direct transaction costs. A negative transaction costs figure might arise where there is a timing difference between inflows and the settlement of the resultant purchases.
- † Operating charges, otherwise known as the OCF is the ratio of the Fund's total disclosable costs (excluding overdraft interest) to the average net assets of the Fund. It includes the annual management fee as well as the administrative costs incurred by the Fund. Included within the OCF are synthetic costs which include the OCF of the underlying funds weighted on the basis of their investment proportion. The annualised OCF for the current period is 0.77%.

#### Synthetic Risk and Reward Indicator ("SRRI")

The Fund is ranked at 5 because funds of this type have experienced moderate to high rises and falls in value in the past.

The Fund's category is not guaranteed to remain the same and may change over time.

Even a fund in the lowest category is not a risk-free investment.

The value of your investment and any income you take from it may fall as well as rise and is not guaranteed.
