Please add any additional requirements here					

Important: please supply information promptly as quotes are typically guaranteed 14 days.

Notes:

- Defined Benefit sources of money may only secure Scheme Pensions.
- Defined Benefit sources of money can use gender specific annuity rates where available (from Aviva and Canada Life).
- Money Purchase benefits will be gender neutral unless specifically requested otherwise and provider can accommodate (restrictions apply).
- Manual quotations prepared via this template that are outside our core services are subject to an administration charge as set out in the Charges Schedule.
- GMP age is assumed to be 60 for females and 65 for males. In the event of the member's death before GMP age any spouse's GMP will be payable if the member is married or in a civil partnership. It will be assumed that any excess pension prior to GMP age given above includes the spouse's GMP (which must increase as required by legislation) unless you specify to the contrary.
- We recommend you speak to your scheme's legal advisers on the following:
 - How Gender Specific Pricing should be handled and how it affects your scheme
 - How statutory increases should be handled. Note annuities that keep track with the Consumer Prices Index (CPI) are not currently available.
 - How to proceed if GMP has not been equalised.

GMP revaluation based on date of leaving

before 6 April 1988	8.5%
06/04/88 to 05/04/93	7.5%
